

LAIIVAKANGAS SCHOOL

Textile handicrafts, 6th grade

First there were balls of wool...

with many colours, warm or cool...

Knitting needles
are needed, too...

...five of them,
not just one or two!

Hey...add a few colour spots,
and you can have colourful hedgehogs!

They started to design,
choosing colours and patterns...

to create their own,
beautiful mittens.

Teacher showed how...

...to make those five needles dance...

...around and around in their little,
nifty hands!

With patience they knit,
to make mittens fit.

With hand made
mittens,
their hands don't get
frost bitten.

Mittens to match their
own special styles,
gives them lots of
sunny, happy smiles,
to warm up our dark,
and cold winter times.
